Profile

Experienced Full Stack .NET Developer passionate about crafting scalable and secure web applications using ASP.NET Core MVC, C#, and modern front-end frameworks. Skilled in leveraging Azure cloud services, API development, and identity management to build robust solutions. Dedicated to applying clean architecture, Agile practices, and CI/CD pipelines to deliver high-quality, maintainable software. Known for optimizing database performance and implementing strong authentication protocols, while thriving in collaborative, fast-paced team environments.

Areas of Expertise

- C# Programming
- ASP.NET Framework and Core MVC Development
- RESTful API Design and Integration
- Front-End Development (Angular.Js, Knockout.js)
- SQL Server & Entity Framework
- Security Protocols (SAML, WS-Federation, SSO)
- Identity & Access Management (Microsoft Entra, RBAC)
- Unit and Integration Testing
- Version Control (GitHub, Azure DevOps)
- Agile Methodologies
- Azure Function Apps, Storage Explorer
- CI/CD Pipelines
- Stored Procedure Optimization
- Performance Tuning (Redis Cache)
- Application Monitoring (Application Insights)
- Hybrid Mobile App Development (Apache Cordova)

Education

APJ Abdul Kalam Technological University

Bachelor of Technology in Information Technology

2018 – 2022

Kerala, India

CBSE Higher Secondary Education

Computer Science with Maths

2016 – 2018

Kerala, India

Experience

RM Education Solutions India Pvt Ltd

Senior Software Engineer

October 2024 – December 2025

Trivandrum, Kerala

- Developed scalable web applications using **ASP.NET MVC**, applying clean architecture and SOLID principles.
- Participated in **Agile** processes, including sprint planning, stand-ups, and iterative feature delivery.
- Built responsive, dynamic UI with **Knockout.js** integrated with backend logic.
- Implemented serverless workflows using **Azure Function Apps** and **Azure Queues**.
- Managed Azure cloud resources using **Azure Storage Explorer** across development environments.
- Implemented authentication and authorization using **SAML** and **WS-Federation** protocols
- Developed **Single Sign-On (SSO)** and identity solutions for secure enterprise access.
- Boosted performance using **Redis Cache** to reduce database load in high-traffic modules.
- Monitored production environments using **Microsoft Application Insights** for real-time diagnostics.
- Utilized **Microsoft Entra** and **Microsoft Graph API** for centralized identity and access management..
- Integrated **Google Directory** and **Classroom APIs** via Google Admin Console for identity management in Google.
- Designed and consumed secure APIs with authentication, validation, and audit logging.
- Managed **role-based access (RBAC)** and group policies using **Entra ID** and **Active Directory**.
- Followed **CI/CD** practices for automated builds, testing, and deployments in coordination with QA and DevOps teams.

- Developed and maintained **server-side logic** using **ASP.NET Core MVC**.
- Engaged in **front-end development**, crafting and maintaining intuitive user interfaces for seamless web experiences.
- Contributed to the development of **hybrid mobile applications** using **Angular JS** and **Cordova framework**.
- **Integrated third-party APIs** to enhance application functionality.
- Utilized **Entity Framework** for database design, querying, and optimization.
- Developed and maintained secure and efficient **APIs for external integration**, ensuring data integrity and reliability.
- Implemented and optimized **Stored Procedures** to enhance database interactions and application performance.

Projects

Villa Booking Web App | *ASP .NET Core MVC* 2024

- Developed a web application using ASP .NET Core MVC for booking and managing villas.
- Utilized .NET Core Identity for authentication and role management
- Integrated Stripe Payment System and Apex charts for admin dashboard.

Window Configurator | *ASP .NET Core MVC* 2024

- Designed and Developed a web application module for designing and configuring a user house windows and roller shutters.
- Implemented wizard UI interface for each configuration.

Technical Skills

Languages & Frameworks: C#, ASP .NET MVC/Core, AngularJs, Knockout.js, JavaScript, jQuery, SQL, HTML/CSS, Apache Cordova.

Cloud & Identity Management: Azure Function Apps, Azure Queues, Azure Tables, Azure Storage Explorer, Redis Cache, Microsoft Application Insights, Microsoft Entra ID, Microsoft Graph API, Google Directory and Cloud APIs, Google Admin Console, SAML, WS-Federation, Single Sign-On (SSO), Active Directory, RBAC.

Development & APIs: Secure API design with authentication, validation, audit logging, third-party API integration, Entity Framework, stored procedure optimization.

DevOps & Tools: Azure DevOps, GitHub, Visual Studio, VS Code, SSMS, Postman, Apache JMeter, Android Studio, Xcode, Azure Storage Explorer

Testing & Troubleshooting: Unit & integration testing, Agile methodologies (sprint planning, stand-ups), issue refinements, real-time diagnostics, issue identification and debugging

UI & Mobile Development: Responsive dynamic UI with Knockout.js, hybrid mobile apps using AngularJS and Cordova.
